5.17.1 Constructor & Destructor Documentation

5.17.1.1 Sala::Sala ()

Constructor initiates vector variable lager, with everything available for ordering on a pizza

5.17.2 Member Function Documentation

5.17.2.1 void Sala::calculateSumOfOrder ()

5.17.2.2 void Sala::createOrder (string *name*, string *address*, int *number*, bool *paid*, bool *delivery*)

Write client and pizza order to file and client to a directory containing a list of customers

Parameters:

name is customers name

address is customers address

number is customers address number

paid is true if order is paid, else false

delivery is true if customer wants a delivery, else false

5.17.2.3 void Sala::enterCrust (unsigned int *input*)

All enter functions push items selected by customer to order vector

Parameters:

input,: is the location of item in order vector for a specific item ordered

- 5.17.2.4 void Sala::enterExtras (unsigned int *input*)
- 5.17.2.5 void Sala::enterLocation (unsigned int *input*)
- 5.17.2.6 void Sala::enterMenu (unsigned int *input*)
- 5.17.2.7 void Sala::enterPizzaSize (unsigned int *input*)
- 5.17.2.8 void Sala::enterToppings (unsigned int *input*)
- 5.17.2.9 **client** Sala::getClient ()
- 5.17.2.10 **client** Sala::getCustomerOrdersVector ()
- 5.17.2.11 vector< **PizzaCrust** > Sala::getLagerpcrust ()
- 5.17.2.12 vector< **PizzaExtras** > Sala::getLagerpextras ()
- 5.17.2.13 vector< **PizzaLocations** > Sala::getLagerplocations ()
- 5.17.2.14 vector< **PizzaMenu** > Sala::getLagerpMenu ()
- 5.17.2.15 vector< **PizzaSize** > Sala::getLagerpsize ()
- 5.17.2.16 vector< **PizzaToppings** > Sala::getLagerptoppings ()
- 5.17.2.17 vector< **Pizza** > Sala::getOrder ()
- 5.17.2.18 void Sala::newPizza ()

Initiate a new **Pizza** order and push back former order to vector order

5.17.3 Member Data Documentation

- 5.17.3.1 **Pizza Sala::lager** [private]
- 5.17.3.2 **client Sala::newCustomer** [private]
- 5.17.3.3 vector<**Pizza**> **Sala::order** [private]

Parameters:

Customer orders are stored on this vector. When customer options for a another pizza the former order is pushed back on this vector

5.17.3.4 `vector<PizzaHelper> Sala::pHelper` `[private]`

Parameters:

A helper vector storing quantity of all items on a single order from vector order
